ASSOCIATE DATA ANALYST

+91-7840806127 | sumanrwt991@gmail.com | Bangalore, IND | [www.linkedin.com/in/suman-rawat-s9](https://www.linkedin.com/in/suman-rawat-s9)

## CAREER SUMMARY

AI Engineer / Data Scientist with experience in building and deploying machine learning and LLM-based applications. Worked on RAG pipelines, model evaluation, and improving response quality using validation frameworks. Experience in developing backend APIs and full-stack applications, along with deploying solutions in production environments. Strong foundation in Python, data processing, and scalable system design.

## TECHNICAL SKILLS

- Programming:** Python, SQL, Angular, HTML, FastAPI
- Frameworks & Libraries:** Pandas, NumPy, Scikit-learn, TensorFlow
- AI/ML:** Machine Learning, LLMs, Generative AI, RAG Pipelines, Model Evaluation
- Tools:** Git, Docker, Azure DevOps, Power BI, dBeaver
- Databases & Cloud:** Postgres, SQL Server, AWS, Microsoft Fabric
- Core Concepts:** Data Structures & Algorithms, System Design, Object Oriented Programming

## WORK EXPERIENCE

- Associate Data Analyst | Sagility** Jan 2026- Present
  - Worked on LLM-based chatbot using RAG pipelines, processing PDFs/text via OCR, embeddings, and vector search for domain-specific query handling
  - Improved LLM response quality using LangGraph-based validation framework
  - Developed FastAPI-based backend APIs and integrated Angular frontend for end-to-end AI applications
- Graduate Engineer Trainee | Qualfon Advanced Technology Center** July 2025- Dec 2025
  - Query and manage large datasets using SQL Server to support BI reporting and performance analytics.
  - Develop and validate Power BI dashboards and RDL reports to deliver accurate and actionable insights.
  - Collaborate with cross-functional teams to improve data models, reporting governance, and standard reporting processes.
- Data Analyst Intern | Routine Regime Pvt Limited** Mar 2025- May 2025
  - Standardized and validated healthcare datasets using Python and Excel to ensure data quality and consistency
  - Built analytical insights to identify procurement and supply-chain inefficiencies for cost optimization
  - Evaluated an AI/ML-based healthcare chatbot for model reliability, response accuracy, and performance metrics.

## PROJECTS

- Predictive Modeling for Employee Attrition – IBM HR Dataset**
  - Built and evaluated classification models; handled class imbalance using SMOTE to improve accuracy.
- Social Media Sentiment Analysis**
  - Developed sentiment models on 10K+ reviews; implemented preprocessing pipelines to boost performance.

## EDUCATION AND CERTIFICATION

- BSc Honours Statistics | University of Delhi, New Delhi 2019-2022
- Masters in Computer Applications | Amity University, Noida 2023-2025
- Foundation in Data Science and Programming | IIT Madras Online 2022-2023
